
The Neurosequential Model of Therapeutics © NMT Training Certification Phase I: 2021 Netherlands Boot Camp

NMT Training Certification: Brief Overview

The Neurosequential Model of Therapeutics (NMT) is a neurodevelopmentally informed, biologically respectful perspective on human development and functioning and is used in the clinical problem-solving process. NMT Training Certification is a training process meant to certify exposure to and participation in training activities. This training is a clinical enhancement, capacity building project providing exposure to core concepts underlying the NMT and to the clinical applications of this approach. The primary focus of Phase I training is to build comfort with, and experience in, organizing clinical information in a neurodevelopmentally-informed way; a primary objective of Certification is to develop competence with the web-based NMT Clinical Practice Tools (the NMT Metrics which yields Brain Maps). Participants are provided multiple opportunities to see multidisciplinary clinical problem solving using the NMT approach in many case-based staffings that are part of the learning process.

The majority of NMT Training Certification is conducted via distance learning using web-archived materials that allow participants to work through the content in a self-paced and self-scheduled manner. The format is incredibly convenient. While this flexibility is truly welcomed, many professionals appreciate interactive opportunities to connect with their fellow NMT learners and practitioners. NMT Boot Camp provides this face-to-face learning experience.

NMT Training Certification – Phase I Boot Camp: The Netherlands 2021

The Neurosequential Network is pleased to offer this Boot Camp for our NMT Training Certification - Phase I Program in The Netherlands on **May 7 & 8, 2021**.

VENUE:

Exact location to be determined in The Netherlands

This Boot Camp is an accelerated, face-to-face learning experience led by Tony Bloemendaal and Roland Verdouw - both Dutch NMT Training Certification Mentors.

The Boot Camp will take place live, in small classroom settings with interactive, face-to-face learning experiences with peers from The Netherlands and across Europe. Please note that participants must bring their own laptop computers to Boot Camp.

NOTE: The entire Boot Camp will be conducted IN DUTCH.

NMT Training Certification – Phase I Curriculum:

The Neurosequential Network's NMT Training Certification Program combines live and self-directed learning opportunities in Phase I. Phase I Training is organized into 12 “modules” (10 training modules and 2 reflection modules), and a provided training guide articulates all required activities for each module. Participants typically spend one year systematically working through the content. Required curricular elements are outlined briefly below:

1. Multimedia Content:

Video content, recorded presentations, YouTube Channel content, etc.

2. Readings

Syllabus of 21+ professional articles and chapters as well as guided reading of Dr. Perry's book *The Boy Who Was Raised as a Dog*.

3. NMT Core Certification Series Recordings

20+ hours of Introductory and Core NMT Case-based teaching conferences

4. Case-based Seminars: Recordings of the CTA's Friday NMT Case-based Training Series

Recordings of one complete NMT Case-based Training Series (15 hours)

5. Learning Community Discussions and Study Group Participation

Participation in monthly, 1-hour Study Group call led by NMT Trainers and Mentors

6. NMT Online Clinical Practice Tools (aka the NMT Metrics or Brain Maps)

Access to and ample practice with NMT Online Clinical Practice Tools to allow each participant to become familiar with the NMT metrics. Also, participation in Metric Tool Scoring calls and participate in bi-annual Fidelity Exercises.

The NMT Phase I Boot Camp, conducted in retreat style fashion, is a terrific way for participants to jump-start their Certification process and provides clinicians with opportunities for in-person learning and relationship-building.

Once Phase I Training is completed, clinicians join a worldwide network of NMT Trained providers who share best practices on an ongoing basis and may elect to move on to Phase II/Train-the-Trainer (TTT) directly or enroll in the Maintenance Phase.

For complete NMT Certification Program details, [see our Overview here](#):

Cost:

The total registration cost for this NMT Phase I Boot Camp including the full NMT Training Certification - Phase I Program and materials is \$4500 USD. Initial payment of \$2250 USD is due upon enrollment with the remaining balance of \$2250 USD due on or before May 1, 2021. A single, lump sum payment of \$4,500 USD is also possible.

Registration cost INCLUDES:

- Your full NMT Phase I Boot Camp Program in The Netherlands
- Your full enrollment in the NMT Training Certification - Phase I Program including materials
- Lunch and Dinner on Friday, May 7th, and Lunch only on Saturday, May 8th.

Registration cost DO NOT INCLUDE:

- Any transportation or hotel accommodations

Reminder regarding accommodations:

Reminder that NMT Boot Camp cost does NOT include accommodations. The Bootcamp will be held in The Netherlands. Participants will be fully responsible for securing their own hotel and making appropriate travel arrangements.

We look forward to this unique training experience and are happy to answer any/all questions. Please contact Jana Rosenfelt, M.Ed. for more information at 281-932-1375 or JLR@neurosequential.com

VERY IMPORTANT: Every effort will be made to offer an in-person experience, but if it proves unwise at any point to continue plans for a face-to-face Boot Camp due to COVID19 related concerns, we reserve the right to transition to a virtual Boot Camp experience instead. No refunds will be given in the event that we transition to a virtual Boot Camp; instead your registration will simply transfer to over to the virtual enrolment. All other details will remain the same.
